

Surrey Ion Beam Centre

Timeline

1960s

The Ion Beam group of the University of Surrey started in 1960s at Battersea Polytechnic

**Director:
Douglas Chick
(1960s)**

1966

In 1966, the Battersea Polytechnic became the University of Surrey and moved to Guildford. It set up initially in an abandoned paint shop in Denis's Fire Engine Factory, while purpose-built laboratories were built on the University campus.

1966

The Ion Beam Research for
Microelectronics moves into Dennis'
Paint Shop in Guildford

500 keV Implanter

2 MV Van de Graaf beam lines

1972

Purpose built laboratory at Stag Hill
Campus, University of Surrey

Director:
Ken Stephens
(1981)

1990

Purpose built laboratory at Stag Hill
Campus, University of Surrey

1991

New MV implanter installed in the newly built Chick Lab

**Director:
Brian Sealy
(1995)**

1997

New 200 keV Danfysik implanter installed in the Chick Lab.

2001

Building extension (Stephens Lab) to house the 2 MV Tandetron accelerator

2002

Installation and commissioning of the 2 MV Tandetron with a single beam line, the Centre's first microbeam

2002

Decommissioning of old lab and Van de Graaf accelerator

**Director:
Roger Webb
(2004)**

2004

Commissioning of the external beam line

Certification No 181855

2007

Awarded ISO9001 Certification

2008

Commissioning of the Vertical beamline
and Bio Tower

**2009 - Support of Public and
Industrial Research using Ion
Beam Technology (SPIRIT)
Project starts**

2009

First Nanobeam Line

2012

Ambient Pressure MeV-SIMS

**2013 - Supporting Postgraduate
Research with Internships in
industry and Training Excellence
(SPRITE) Project starts**

2018/19

Installation and commissioning of Single Ion Implanters

**2019 - Research And
Development with Ion Beams –
Advancing Technology in Europe
(RADIATE) Project starts**

2022

Installation and commissioning of the
high resolution ToF-ERDA system

**Director:
Satheesh
Krishnamurthy
(2024)**

2024

Installation and commissioning of the
1.25 MV implanter
